

## Interconnect cables

What really counts in a cable are not the cold numbers of technical data, but the performance that is offered. Transparency, detail, and speed - because nothing should interfere with the sound. These are the features offered by the 'Ohr and Navi cables, thanks to the intelligent use of top-quality materials and components - in Navi's case meeting the strictest military standards.

**Chevel 'Ohr** INTERCONNECT CABLE

Insulation:	High purity class 1 extruded teflon
Wire:	Avg in double multistrands section individually isolated and shielded
Terminations:	Gold plated rca connectors
Standard lengths:	0,7 - 1,0 m
Different lengths:	On request
Colour:	White

**Chevel Navi'** DIGITAL INTERCONNECT CABLE

Insulation:	High purity class 1 extruded teflon
Structure:	Coaxed multiscreen
Wire:	Avg in solid cores of 0,5 mm
Wire structure:	Oxygen free macro copper oriented crystals
Terminations:	Modulars military standards for high frequency
Standard lengths:	0,7 - 1,0 m
Different lengths:	On request
Colour:	Black
