

Zeroha II TONE ARM

The perfect solution: the epitome of all that is simple and essential. Zeroha II applies only those principles of physics that permit breathtaking performance. Not a single useless bangle or doodad! With its clean lines and skilfully worked materials, Zeroha II is the perfect complement to any turntable - and especially the Mel Audio Go El Improved.

Technical Data

System:	Unipivot silicon damped
Pivot:	Changeable harmonic point
Antiskating:	New and revolutionary use: inertial system
Arm lift:	Mechanical system with adjustable friction
Terminations:	Gold plated rca connectors mounted on external support
Wiring:	Air litz
Effective length (pivot - stylo):	237 mm (9")
Overall length:	310 mm (12,2")
Cartridge weight:	4-16 g (0,14 - 0,56 oz) with the option to increase tone arm mass
Resonance:	Around 7 Hz
Effective mass:	16 g (0,56 oz)
Features:	Lateral balancing adjustable, assembling on any turntable with special equipped support
